CSC305 UML Class Diagram 1 Exercise 2

Complete Class Diagram 1 Exercise 2 in your UML workbook. Scan or photograph the page and upload here.

If you don't have the workbook yet, here are the instructions for this first exercise:

Simplified class diagrams can also be useful as a mind-mapping tool when designing a system. Use them to break down the system into its component classes and show which ones are directly connected. Include only properties and methods that are needed to give the big picture.

Consider an electronic gradebook system. Think of at least four classes that would be needed. Draw them as labeled rectangles and their relationships as solid lines (without arrowheads).
